

SAVE MONEY

Flow-Rite's ROI calculators show how much an operation will save in labor costs. Other cost savings include cleaner battery tops, equipment, and floors.

FASTER

Snap-on / snap-off water supply connections and fast filling allow for you to fill each battery in less than one minute.

EXTEND BATTERY LIFE AND PERFORMANCE

Properly watered batteries last longer and perform better. Both overfilling and underfilling will result in loss of capacity and life expectancy.

SAFER

Fill batteries without opening vent ports. Avoid battery acid burns, ruined clothing, and noxious fumes.

Pro-Fill

Single-Point Battery Watering System

Your battery maintenance is faster, safer, and more reliable with Flow-Rite's single-point watering system! Pro-Fill is an engineered system with automatic shut-off valves and interconnecting tubing. Simply replace the existing vent caps with your new valves, then add the quick coupler. Once connected to a water supply, the water flows until each battery cell independently reaches the correct electrolyte level.

ProFill

On-Board Battery
Watering System

Patented shut-off valves replace vent caps.

Acid-resistant tubing connects the valves.

A water supply is connected using a quick coupler to fill batteries.

The patented flow indicator signals when to disconnect the coupler.

FEATURES

- Patented three-port 360° swivel tees
- Acid-resistant tubing
- Wide pressure range
- Many water supply options
- Winged caps for easy installation
- 5 year warranty
